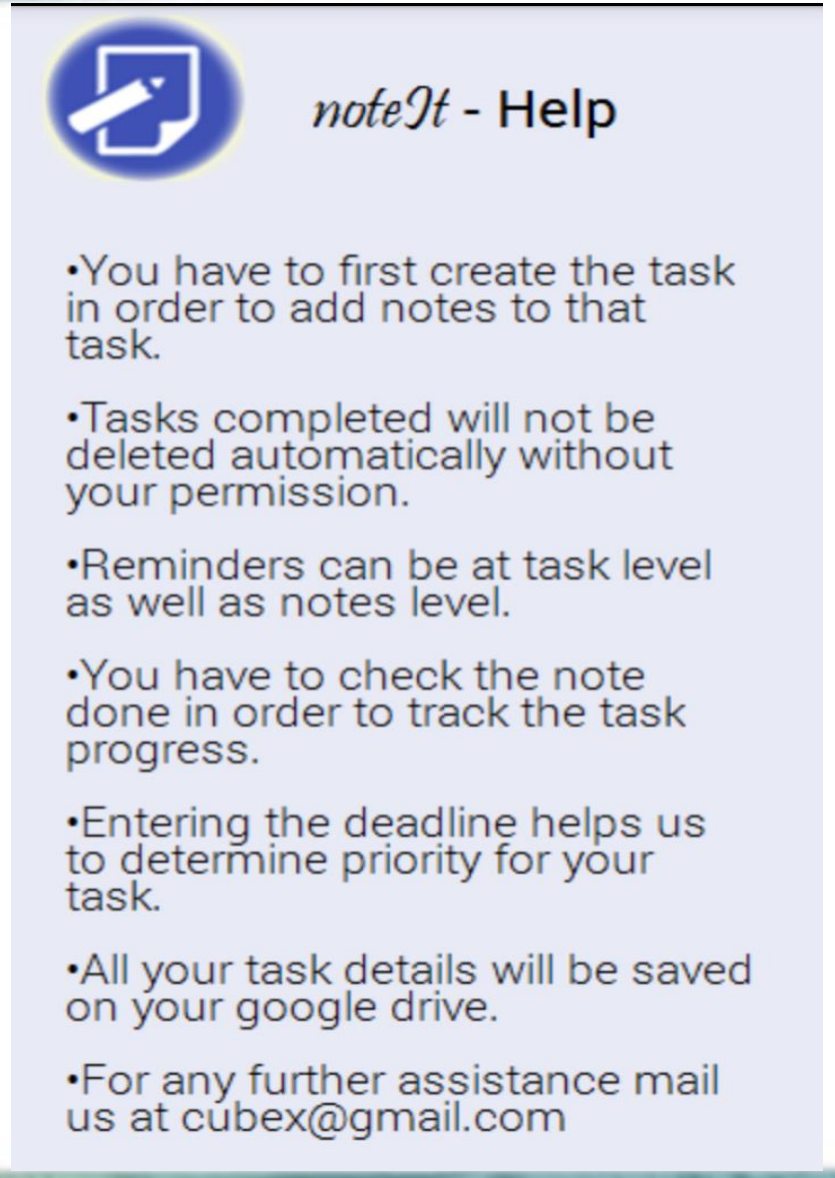
noteIt-help



noteIt - Help
•You have to first create the task in order to add notes to that task.
•Tasks completed will not be deleted automatically without your permission.
•Reminders can be at task level as well as notes level.
•You have to check the note done in order to track the task progress.
•Entering the deadline helps us to determine priority for your task.
•All your task details will be saved on your google drive.
•For any further assistance mail us at cubex@gmail.com

noteIt-about

Future Work

- AppData Synchronization with Google App Engine Data Store
- Group Task Creation
- Custom Sign In
- Adding generic subtask

Thank You
